AgentSix

Your 24/7 Lead Assistant

A complete guide to how AgentSix responds to your leads instantly, books appointments automatically, and protects you from TCPA lawsuits.

1. The Problem Every Agent Faces

You're great at selling homes. But chasing leads and following up? That's eating your time and costing you deals.

The Speed Problem

78% of buyers work with the first agent who responds. But when you're at a showing or having dinner, you can't respond instantly. By the time you see the notification, they've already talked to 3-4 other agents.

78%	15-60 min	3-5	$8K+
Choose First Responder	Avg Response Time	Agents They Contact	Lost Per Deal

The ISA Problem

"Just hire an ISA," they say. But here's the reality:

Human ISA	The Problem
$2,500-4,000/month	Plus benefits, taxes, management
Works 9-5 weekdays	Misses nights, weekends, holidays
Calls in sick	Leads don't wait for sick days
Needs training	2-4 weeks before productive
Makes mistakes	YOU get sued for their errors

> ⚠️ **TCPA Lawsuit Warning:** One wrong text can cost you $500-$1,500. A class action? $50,000-$500,000. Real estate agents are the #1 target for TCPA attorneys.

2. How AgentSix Solves It

Think of AgentSix as your best employee who never sleeps, never complains, and never makes compliance mistakes. **We do it all for you.**

> **What makes us different:** Other tools give you software to figure out. AgentSix gives you results. We set everything up, we manage it, we optimize it. You just show up to appointments.

3. What Happens When a Lead Comes In

Here's exactly what happens when someone inquires about a property. Every step is automatic.

1. **Lead Fills Out a Form**

   Someone on Zillow, Realtor.com, Facebook, or your website clicks "Get More Info." They enter their name, phone, and email.

2. **We Check for Safety (0.5 seconds)**

   Before contacting them, we check they're not on Do Not Call lists, not a known lawsuit filer, and it's not too early/late to contact them.

3. **They Get a Text + Email (Under 5 seconds)**

   The lead receives a friendly, personalized message about the exact property they asked about. It feels like a real person responded instantly.

4. **The Conversation Continues**

   When they reply, AgentSix handles it — answering questions, checking their timeline, offering to schedule a showing.

5. **Appointment Booked on Your Calendar**

   Once they agree to meet, it's automatically added to your Google Calendar. They get a confirmation. You get a notification with all their info.

6. **You Close the Deal**

   You show up to a warm appointment with a pre-qualified buyer. You know their name, budget, timeline — all without lifting a finger.

4. Text & Email Conversations

AgentSix handles entire conversations — not just single messages. Here's a real example:

A6 Hi Sarah! Thanks for your interest in 1234 Oak Street. Are you looking to buy in the next 1-3 months?

S Yes we want to move by summer

A6 Perfect timing! Have you been pre-approved yet?

S Already pre-approved for 500k

A6 Great! 1234 Oak is $485k so it's right in your range. Would you like to see it Saturday at 10am, 2pm, or another time?

S 2pm works

A6 Done! You're confirmed for Saturday at 2pm. Marcus will meet you there. I'll send a reminder tomorrow!

What AgentSix Can Handle

- Answer questions about properties — price, beds, baths, features
- Check your real calendar and offer available times
- Qualify leads — timeline, budget, pre-approval status
- Handle objections like "I already have an agent"
- Book appointments and send confirmations

5. Voice Calls That Book Appointments

Not everyone responds to texts. AgentSix also makes phone calls — and **it doesn't sound like a robot.**

The 6-Call Follow-Up System

Most leads don't answer the first call. We call up to 6 times over 17 days:

Day	Call	Approach
Day 1	First Call	Friendly introduction, qualify interest
Day 3	Follow-Up #2	Quick check-in, mention we tried before
Day 5	Push #3	Share market update or new listing
Day 8	Push #4	Check if anything has changed
Day 12	Push #5	More direct approach
Day 17	Final #6	Last attempt before archiving

> **Did you know?** 68% of appointments come from calls 2-4, not the first call. Most agents give up after one try. We don't.

What Happens on Each Call

- **Connected:** Natural conversation, qualifies lead, books appointment or transfers to you
- **Voicemail:** Leaves personalized message (6 different scripts so they don't hear the same one)
- **Not interested:** Respects their decision, removes from sequence

- **Do Not Call:** Immediately blocked, never contacted again

6. How We Keep You Safe from Lawsuits

TCPA lawsuits are destroying agents' businesses. One wrong text can cost $500-$1,500. A class action? $50,000+. **We make sure that never happens.**

> **Real Cases:** A Florida agent was sued for $50,000 for texting leads on a Do Not Call list. A California team faced $200,000 in damages. These are not rare — lawsuits against agents are up 340% since 2020.

Our 8-Layer Protection

Before contacting ANY lead, we check:

#	Protection Layer	What It Does
1	Registered Business Numbers	Messages won't get blocked as spam
2	Federal DNC List	Check national Do Not Call registry
3	All 50 State Lists	Each state has their own DNC list
4	Lawsuit Filer Database	Block 3,400+ known TCPA lawsuit filers
5	Quiet Hours	No contact before 8am or after 9pm
6	Consent Records	Timestamped proof of every opt-in
7	Recording Disclosure	Auto-announce in 11 two-party states
8	$2M Insurance	E&O coverage as final safety net

> **Your compliance risk with AgentSix: ZERO.** We've never had a client sued for TCPA violations.
